

Læskende lyd-lemonade

Fonologisk udtaletæning – blandet lyde og konsonantklynger

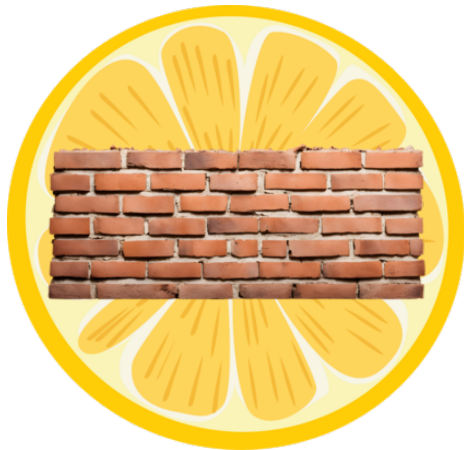

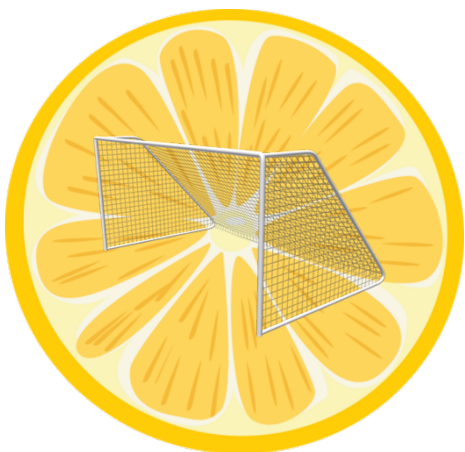

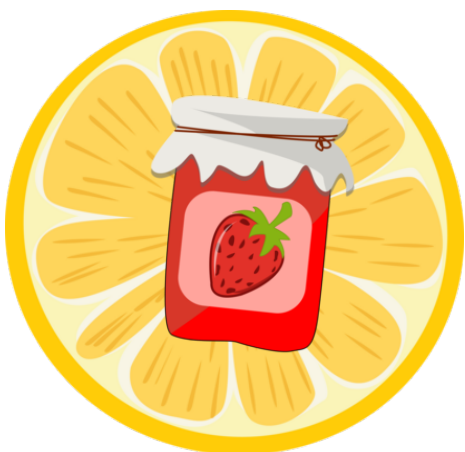

Fremgangsmåde: Udvælg de målord/lyde, som du vil arbejde med. Print materialet ud, laminér evt. og klip citronerne ud. Ha' en dialog med barnet om den lyd I nu skal arbejde med – hvordan lyden produceres/lyder og om barnet kender nogle ord med lyden.

Placer kanden foran barnet, mens citronerne placeres med bagsiden opad. Barnet skal trække én citron ad gangen, benævne ordet (gentag gerne ordet 3-5 gange) og herefter placere citronen i kanden. Når alle citronerne er trukket, er spillet slut.

God fornøjelse!
