

Traktoren løfter tunge t-lyde

Træning af t-lyd

OBS: Til dette materiale kan man med fordel bruge en rigtig legetøjstraktor, da det gør spillet meget sjovere. Hvis man ikke har dette, kan man bruge traktoren nedenfor.

Fremgangsmåde: Udvalg de målord du vil arbejde med. Obs. Sørg for at printe materialet på begge sider af papiret, så halmballerne automatisk ses på begge sider. Herefter lamineres materialet. Jeg anbefaler at laminere materialet, da brikkerne ellers vil være svære at "trække" op. Klip alle høstakkene ud og placer dem med bagsiden opad foran barnet. Fortæl barnet, at vi i dag skal øve os på toglyden (t-lyden). Barnets opgave er at "løfte tunge høstakke med traktoren" (også en god sætning at øve med barnet!).

Barnet skal trække et billede ad gangen med traktoren. Herefter skal barnet vende billedet og benævne ordet. Gentag gerne ordet 3-5 gange, for at træne udtalen ekstra. Når alle høstakkene er trukket op, er spillet slut.

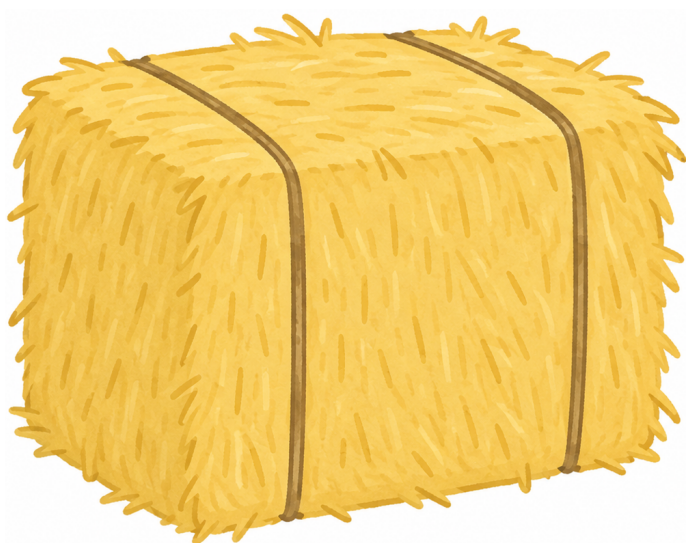

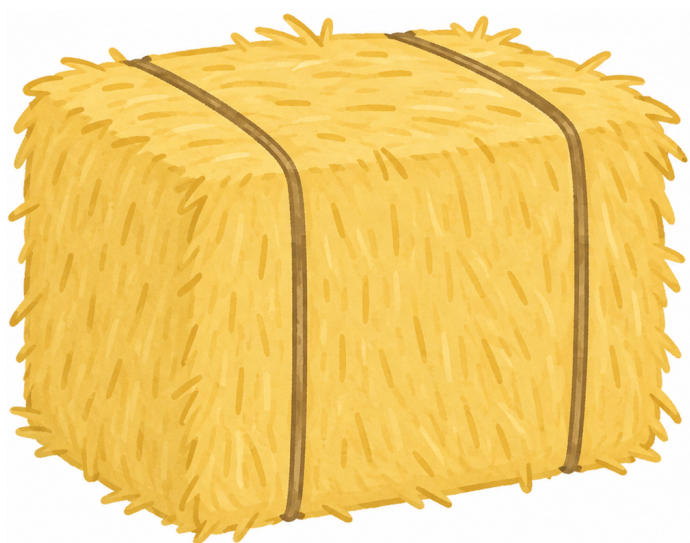

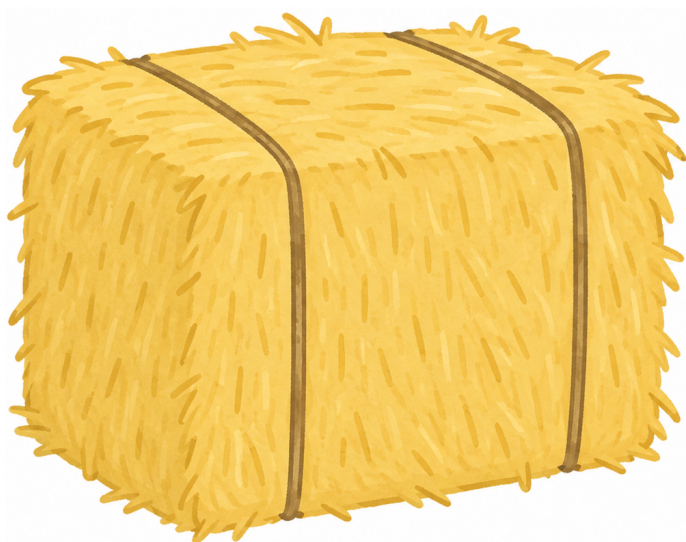

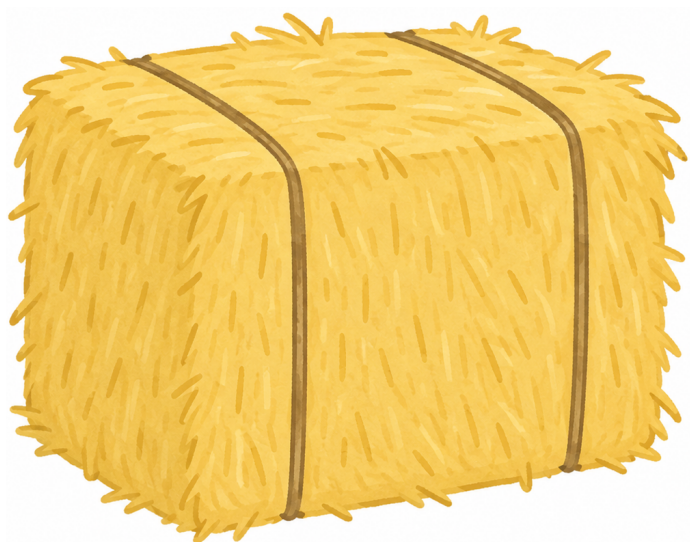

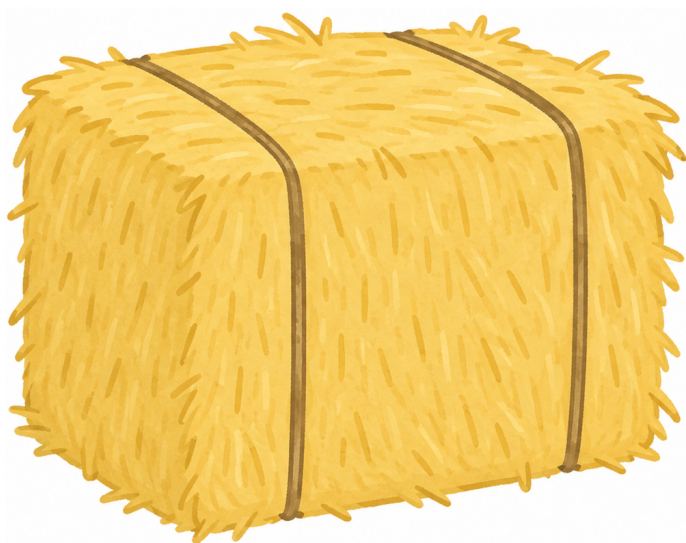

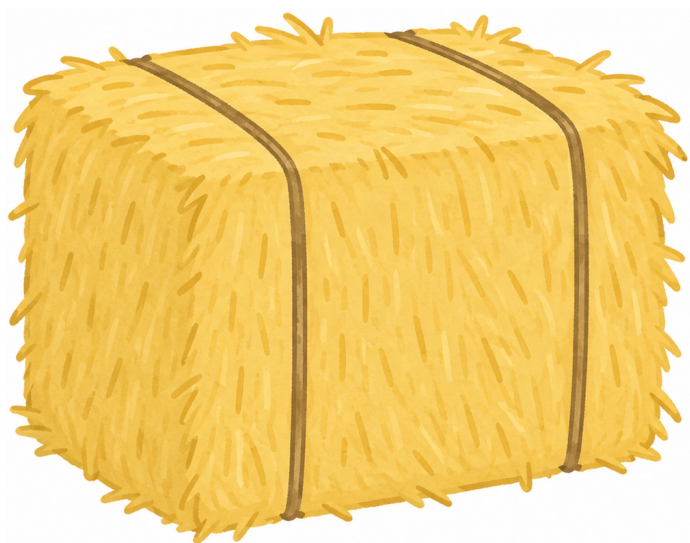

Materialet er udarbejdet af Celine Pitt med billeder fra KuraPlan.
