

# Byg en blomsterbuket

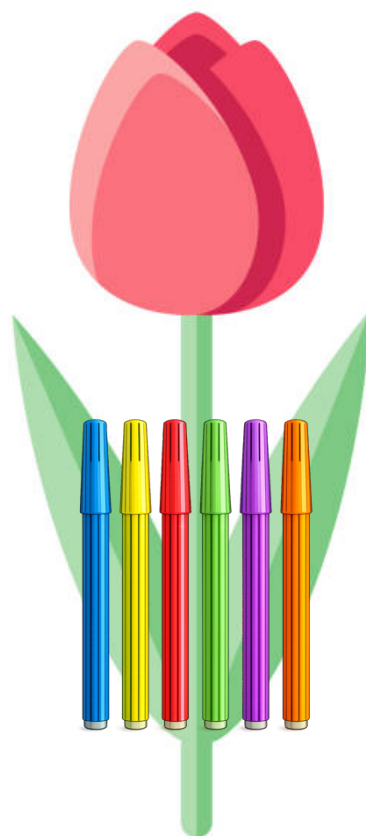

*Træning af t-lyd og t-klynger*

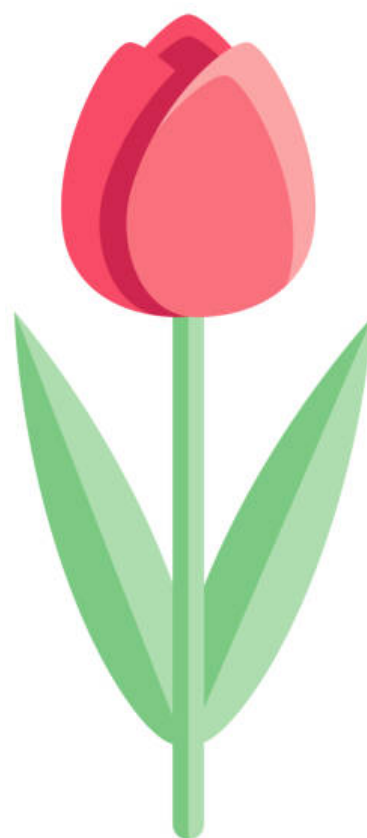

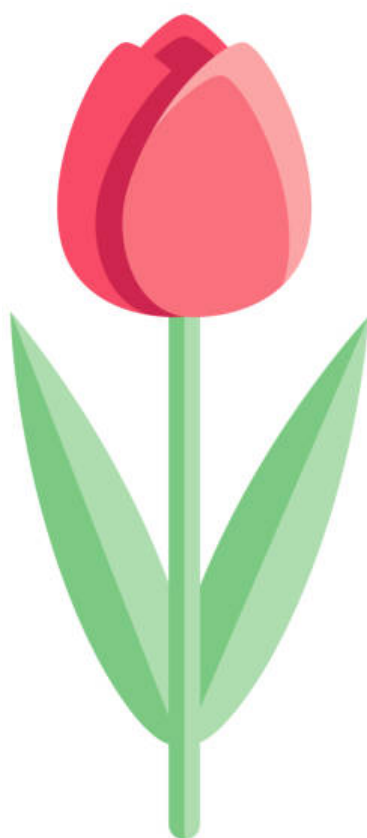

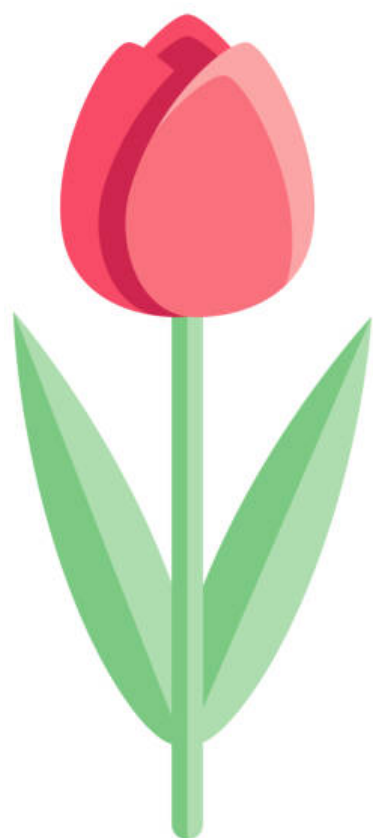

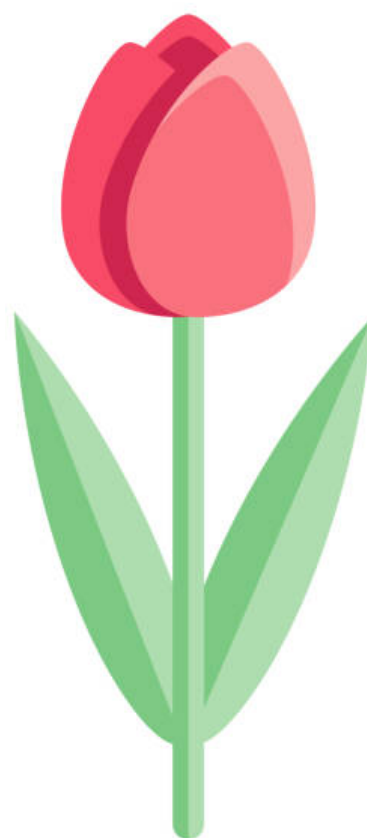

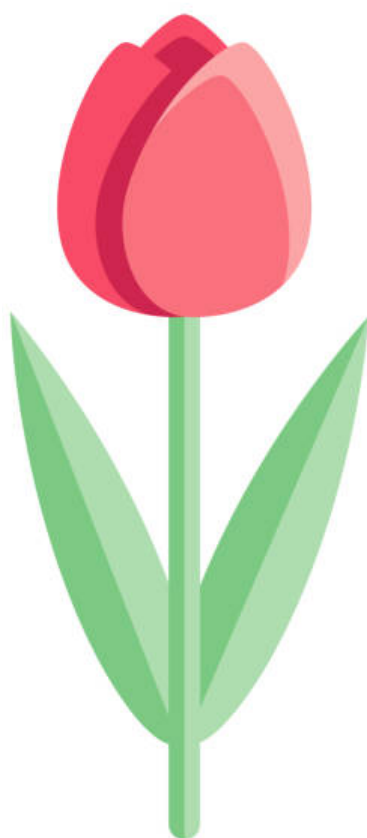

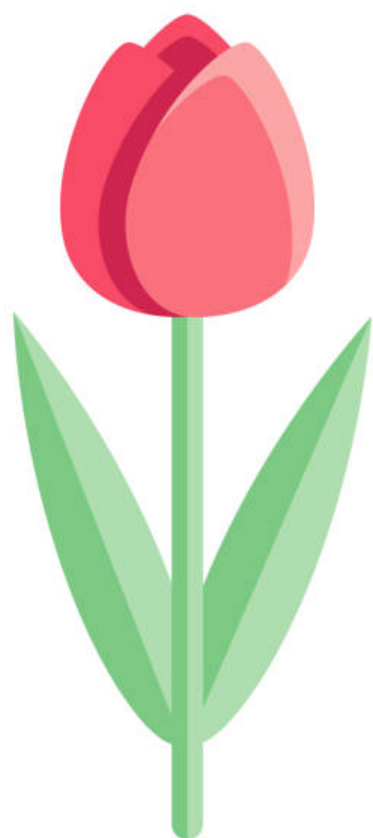

I dette materiale anvendes tulipaner, da det starter med /t/-lyden.

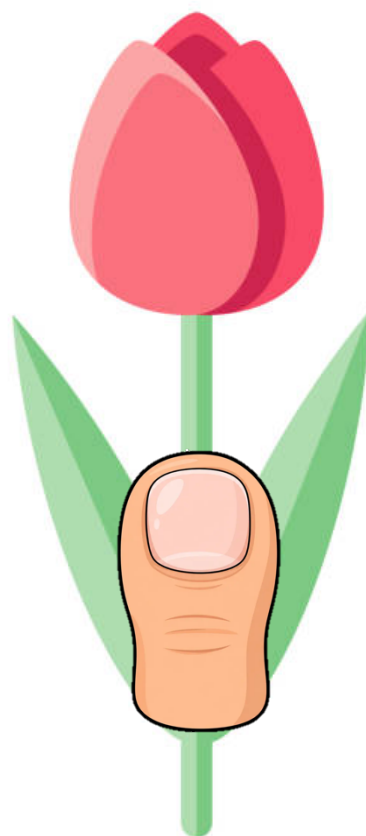

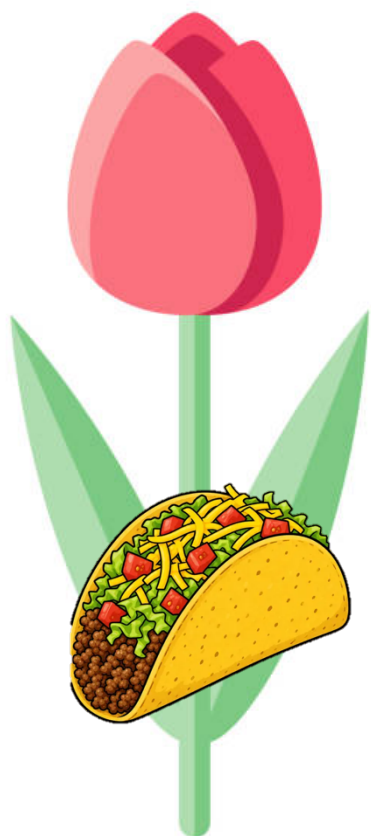

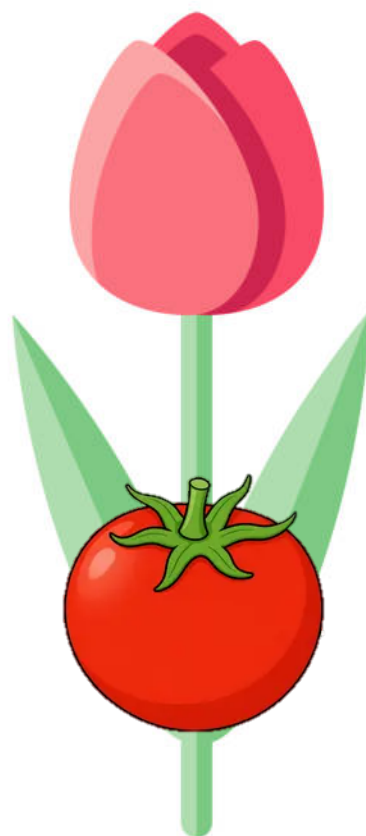

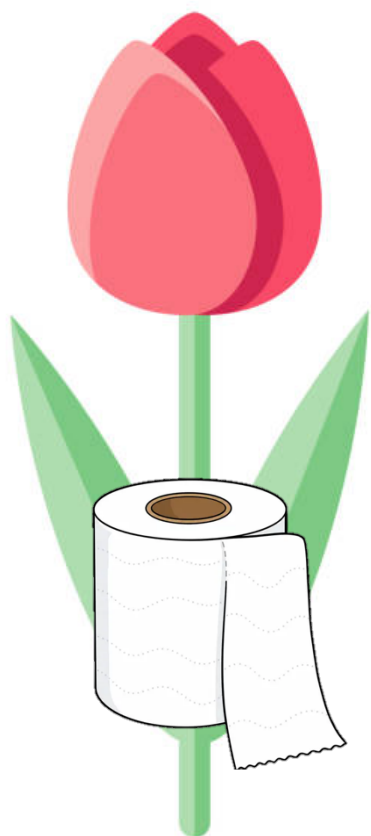

**Fremgangsmåde:** Udvælg den/de lyde du vil arbejde med og print materialet ud. Obs. materialet skal printes på begge sider af papiret. Jeg anbefaler dernæst at laminere materialet, da blomsterne ellers bliver skrøbelige og svære at arbejde med. Vær obs. på at materialet er lavet i mange forskellige versioner – du kan derfor med fordel, printe flere forskellige lyde ud, så flere lyde øves samtidigt (fx erstatningslyd og produktionslyd – find dem under hver lydkategori).

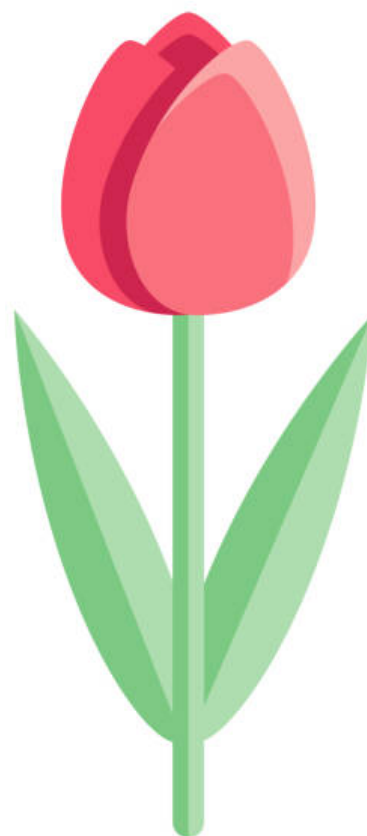

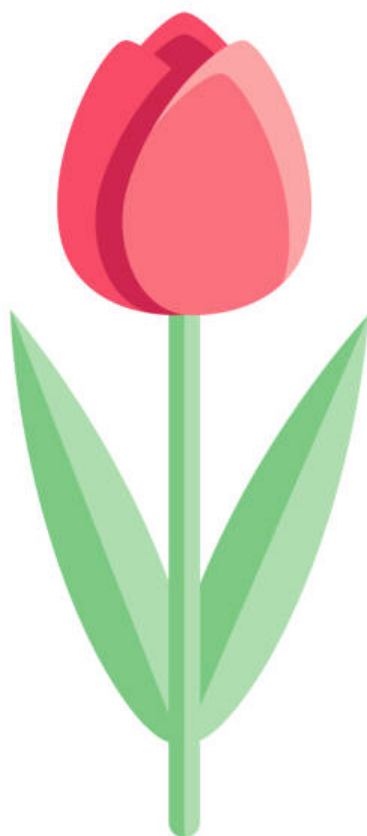

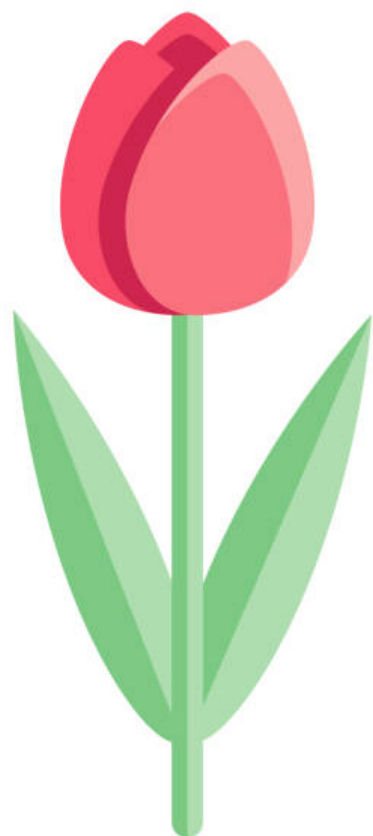

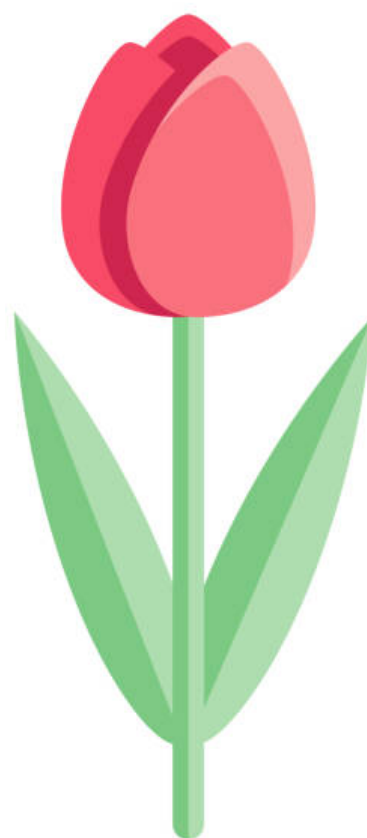

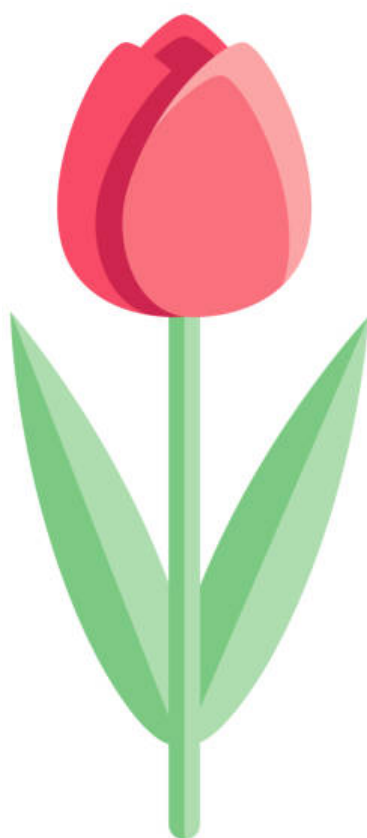

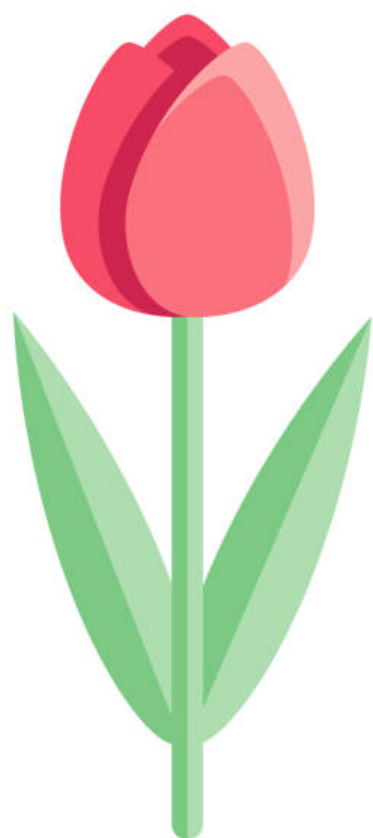

Klip blomsterne og krukken ud. Placér alle blomsterne med bagsiden opad. Barnet skal trække én blomst ad gangen, benævne ordet (gentag gerne 3-5 gange) og herefter placere blomsten i krukken. Fortsæt indtil hele blomsterbuketten er samlet.
