

Ambulancespil

Til træning af medial og final -ng lyd

Til dette spil skal man bruge en legetøjsambulance, da dette gør spillet endnu mere levende. Hvis man ikke har dette, kan man blot anvende bilen nedenfor.

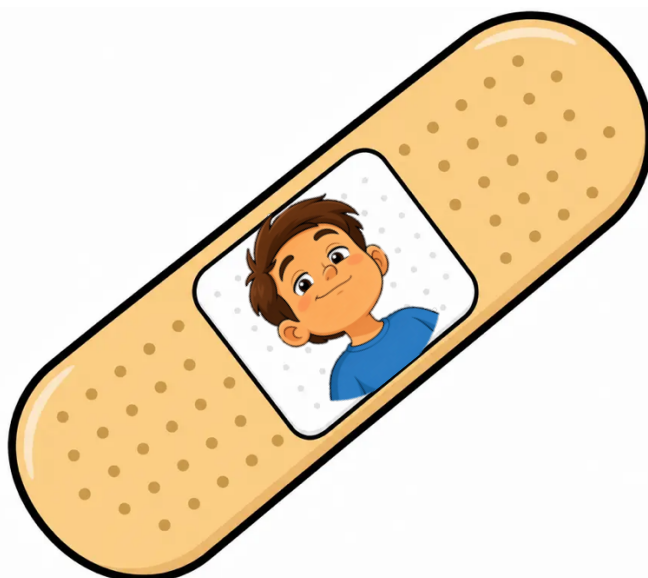

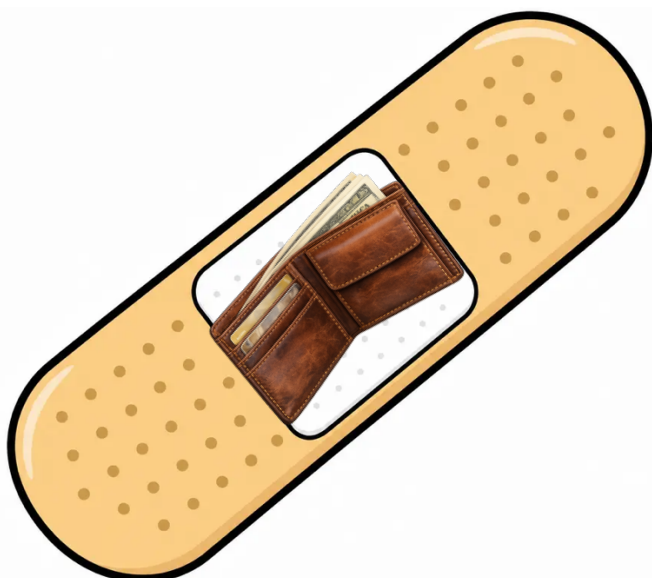

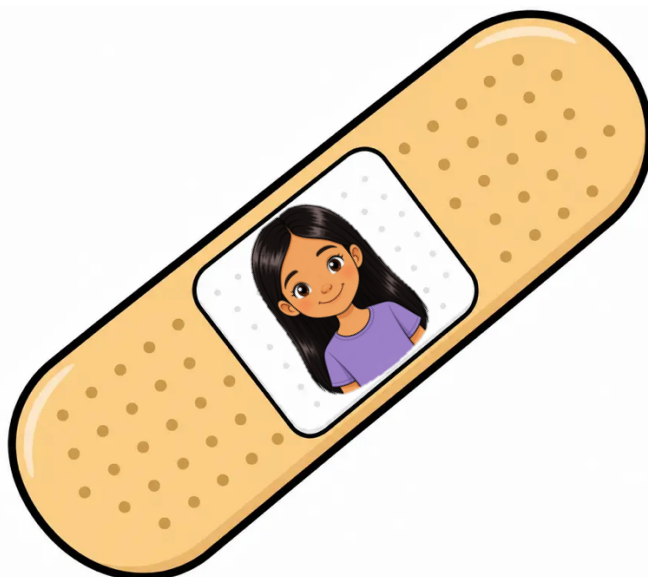

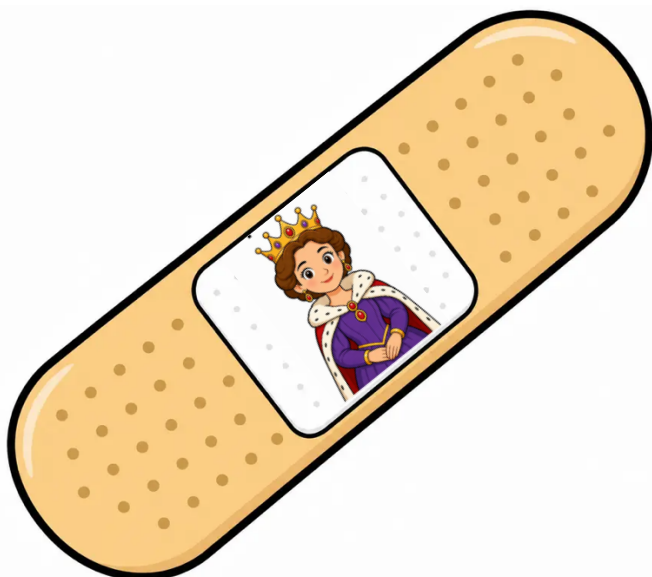

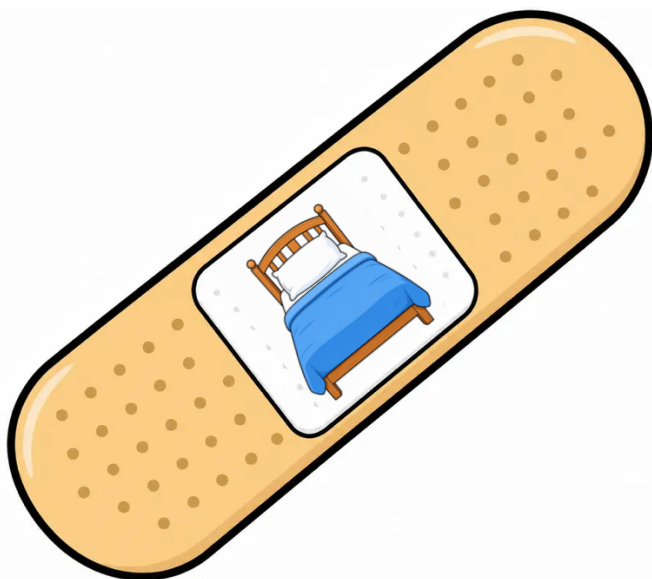

Fremgangsmåde: OBS. print materialet ud på begge sider af papiret. Udvalg de målord du vil arbejde med og klip plastrene ud. Placér dem rundt omkring på bordet eller tag spillet med ned på gulvet, så det bliver en endnu sjovere leg.

Inden spillet starter så snak med barnet om den lyd der skal øves i dag – ”**bang**lyden”. Ambulance udtales ”ambulangse” og er derfor et godt ord i sig selv at øve. Øv udtalen af ”ambulance” først og start herefter spillet. Barnet skal køre rundt med ambulancen og samle de forskellige plastre op. Når et plaster samles op, skal barnet benævne målordet (gentag 3-5 gange). Fortsæt indtil alle plastrene er samlet op.

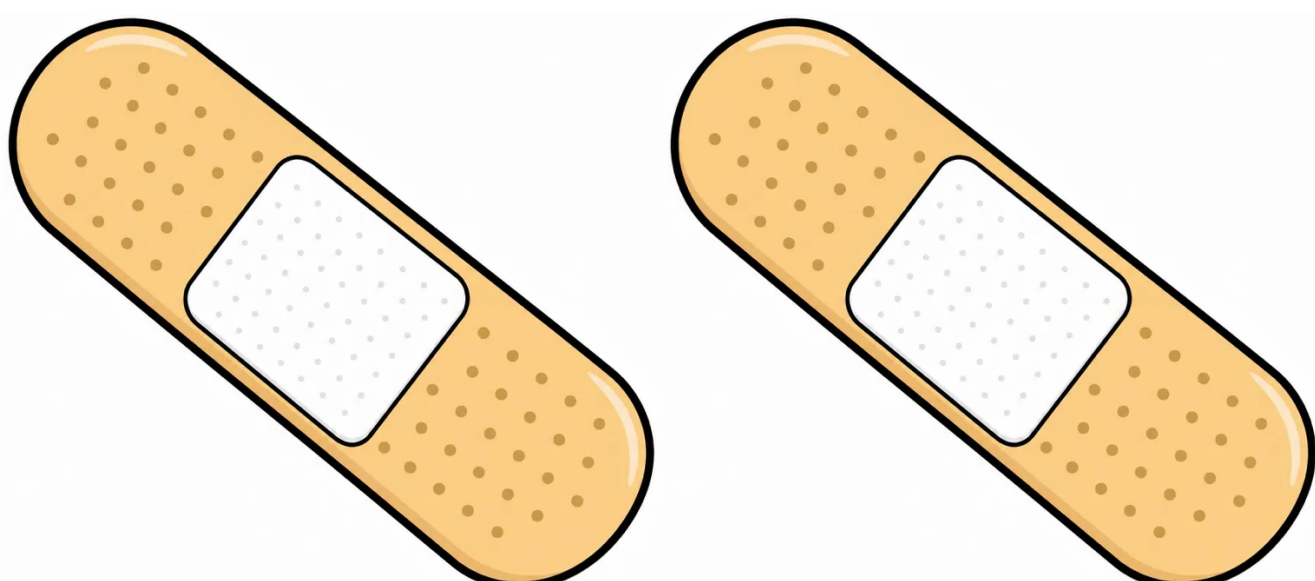

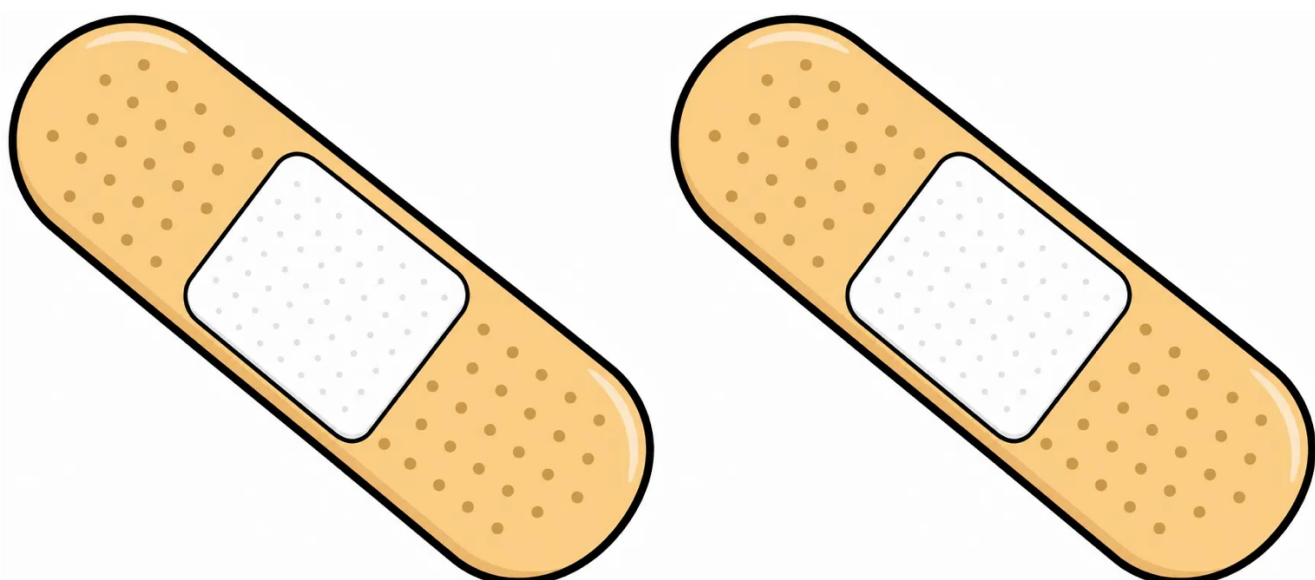

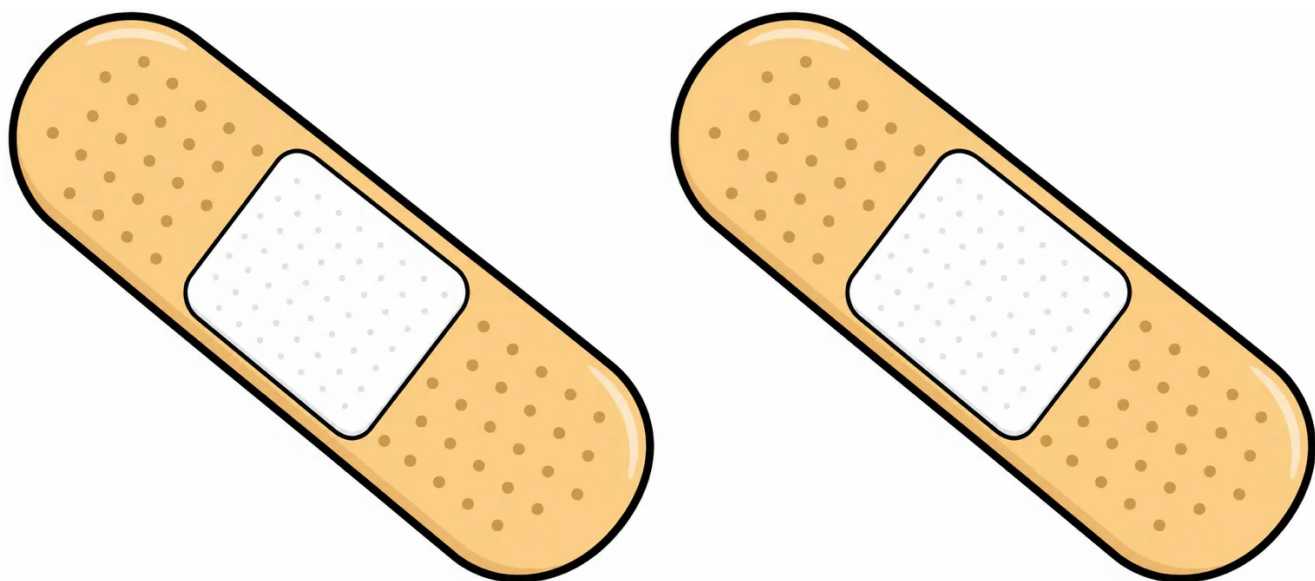

TIP: For at automatisere lydene til spontantalen, kan man med fordel øve målordene i en sætning. Man kan fx sige ”på plastret er der en...” eller ”i ambulancen er der en...”.

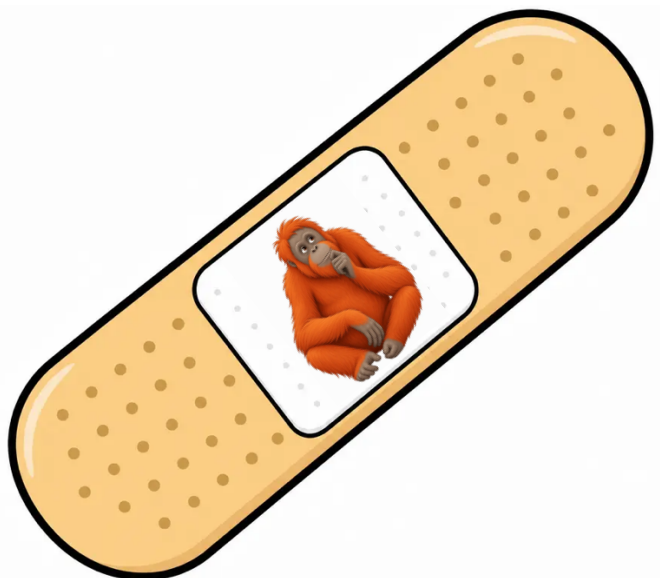

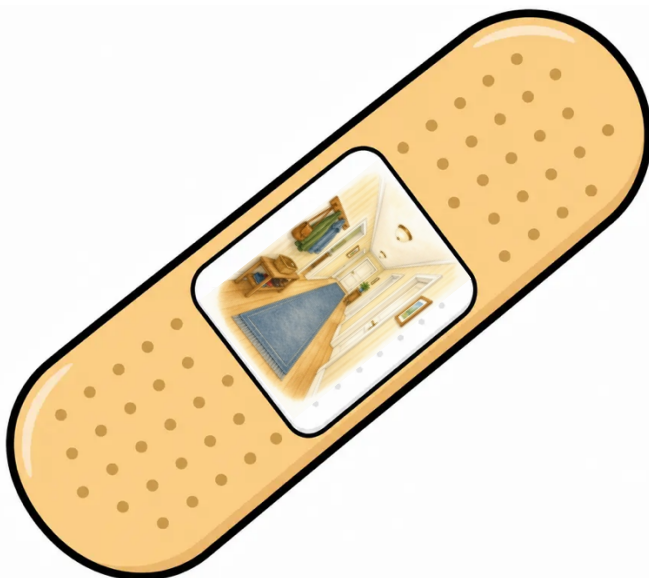

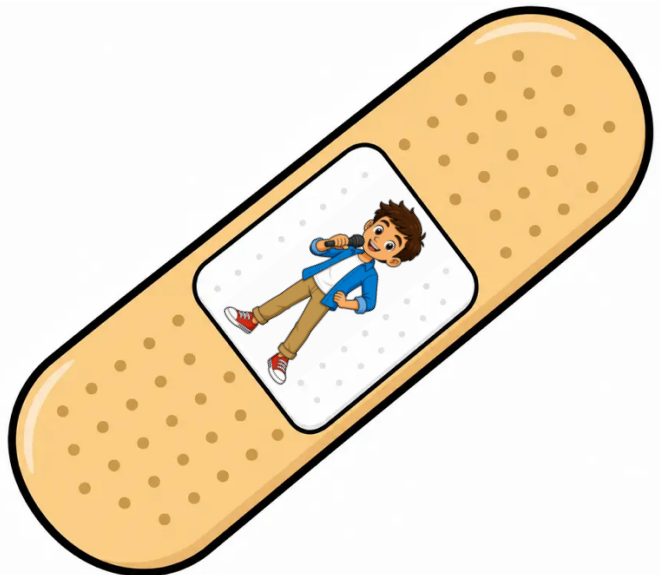

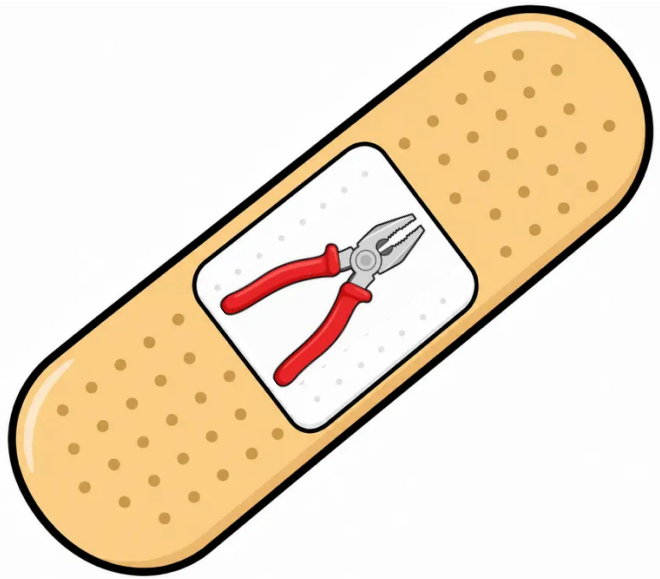

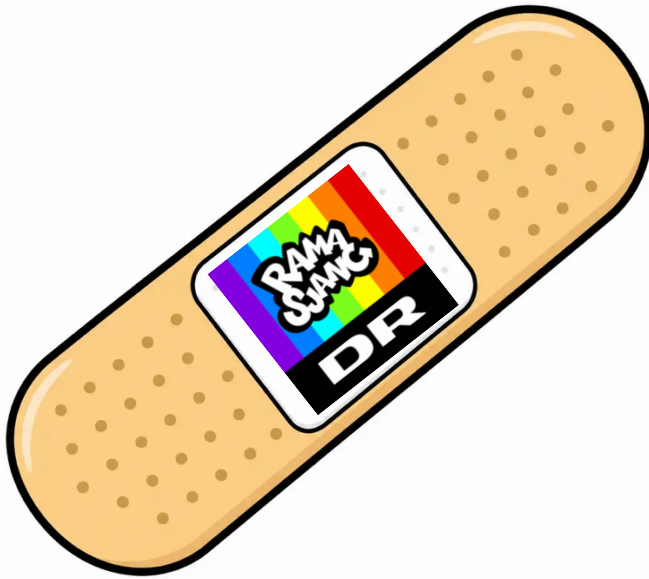

Finalt -ng

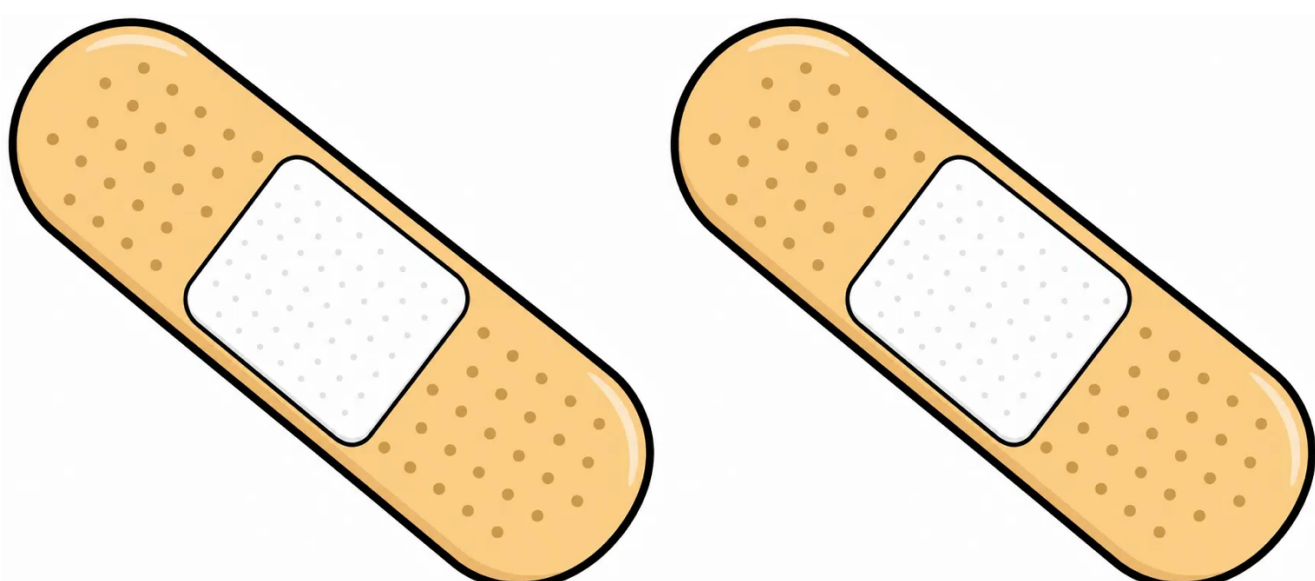

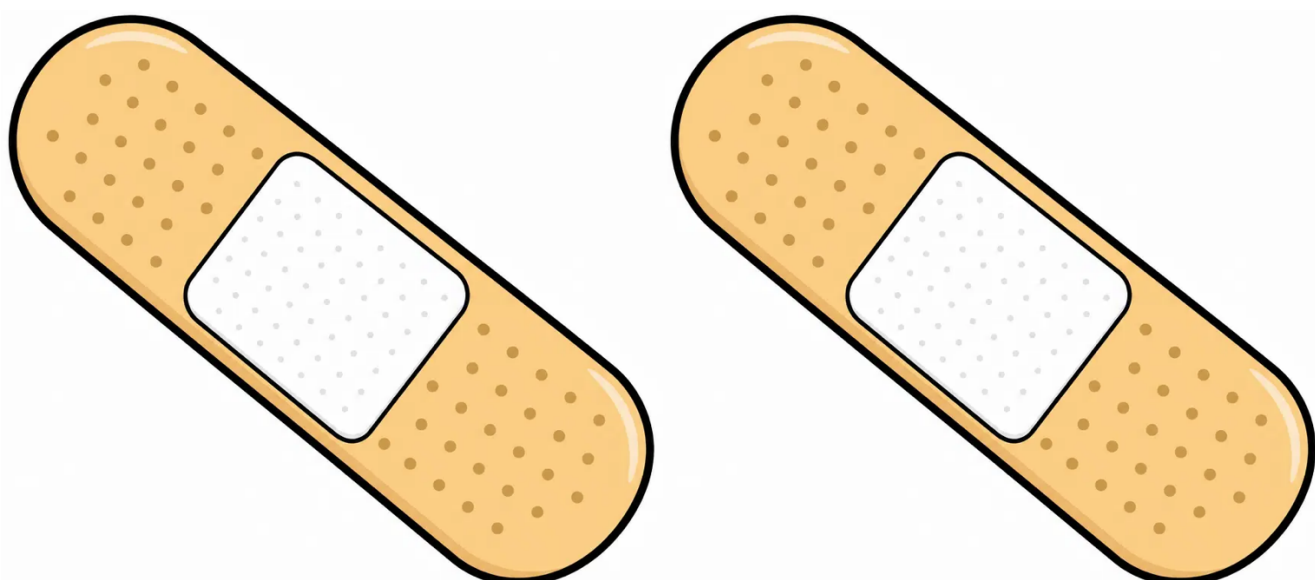

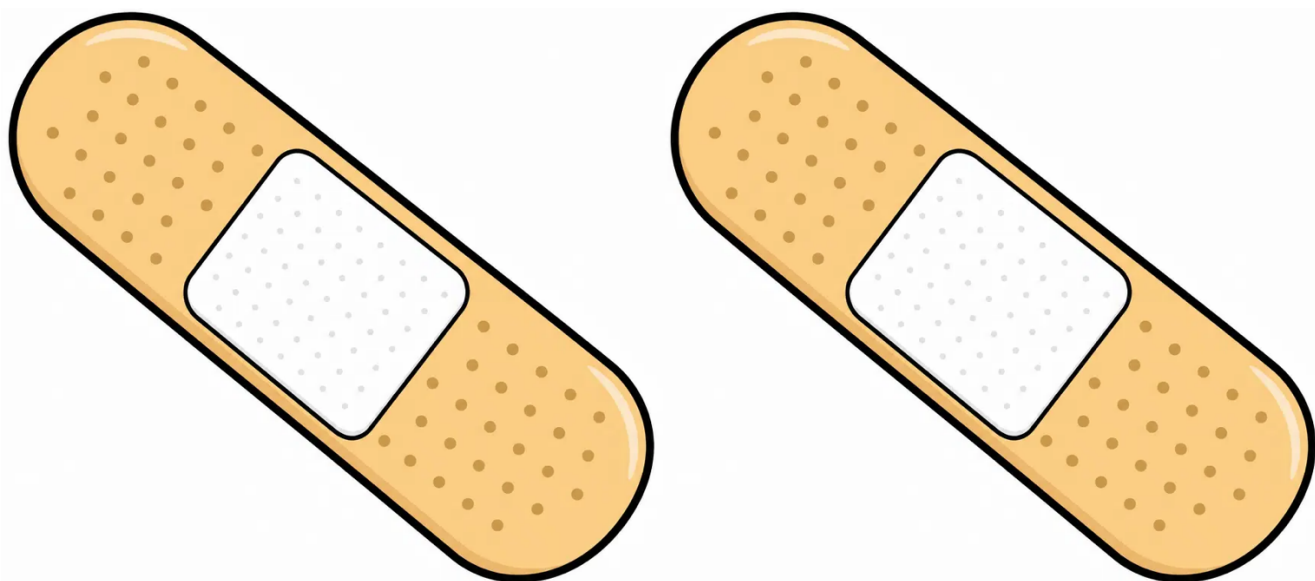

Ordliste: seng, eng, dronning, langt (hår), pung, dreng

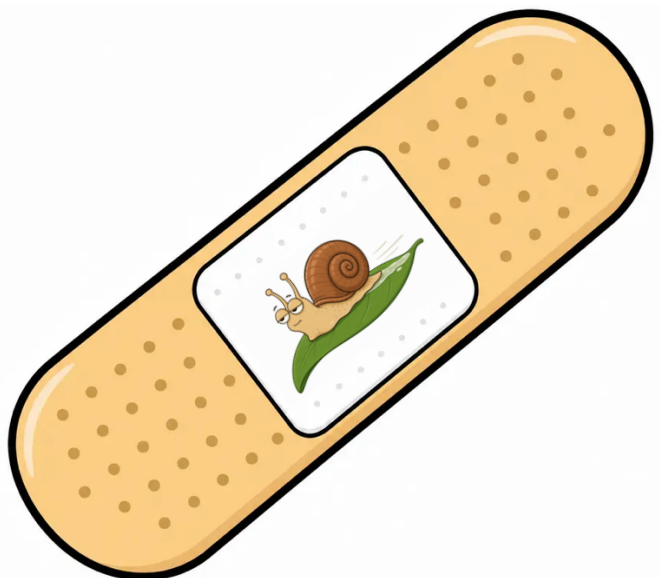

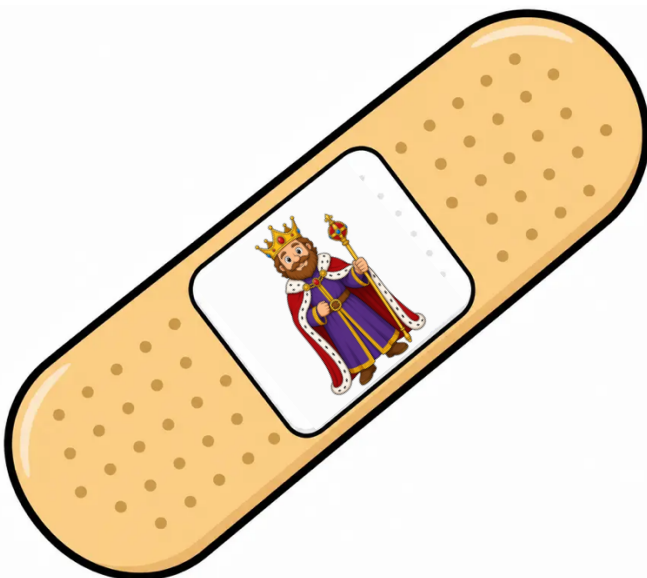

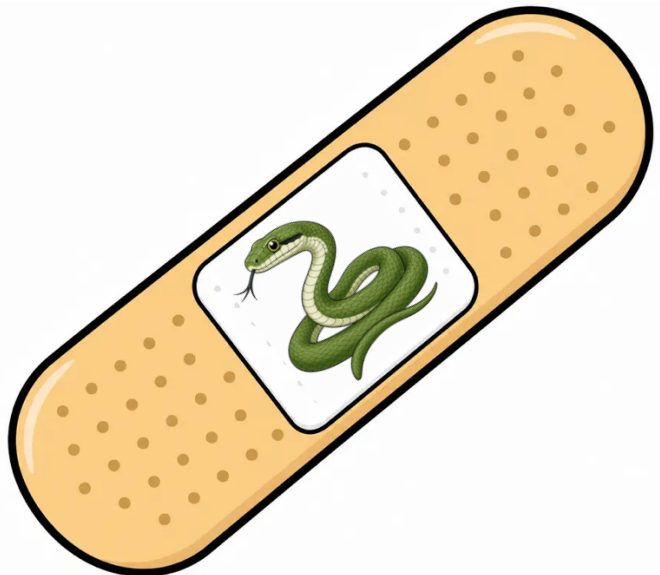

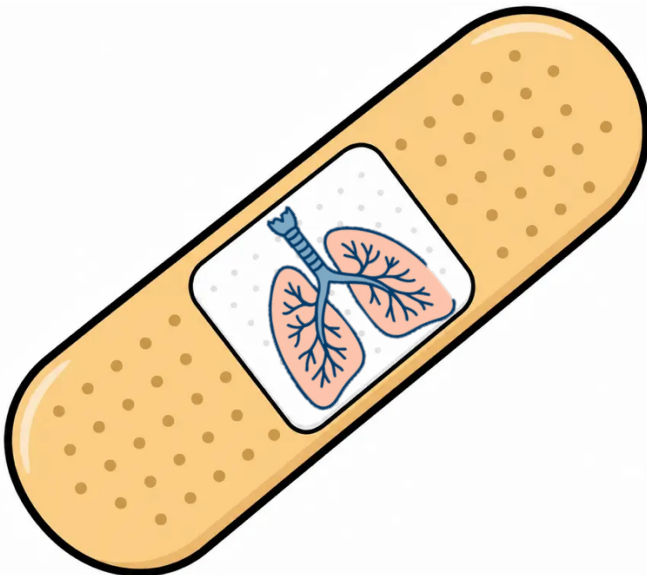

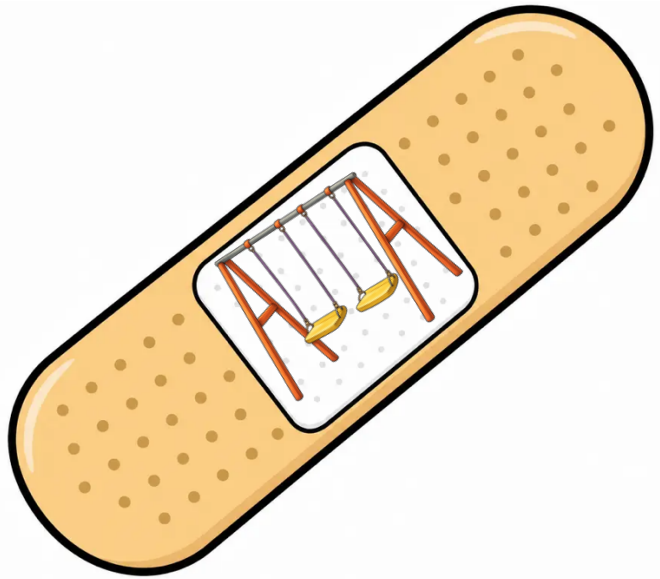

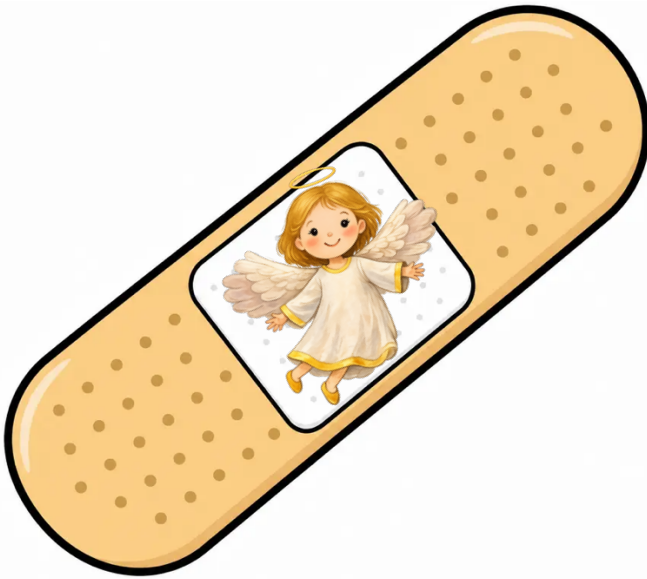

Finalt -ng

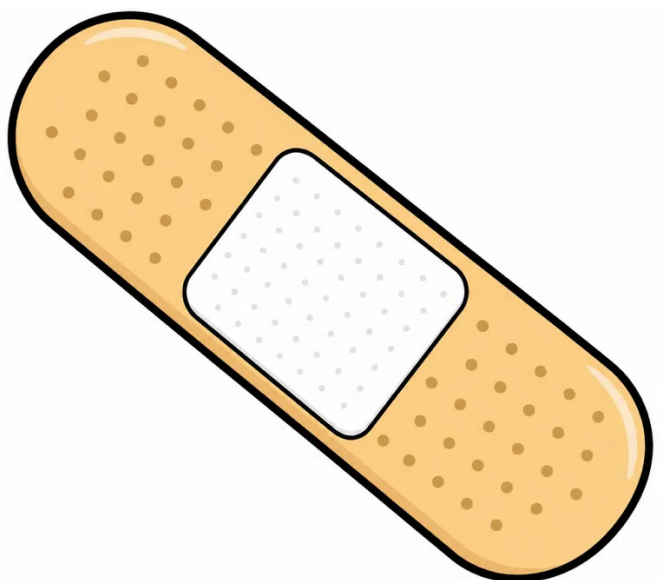

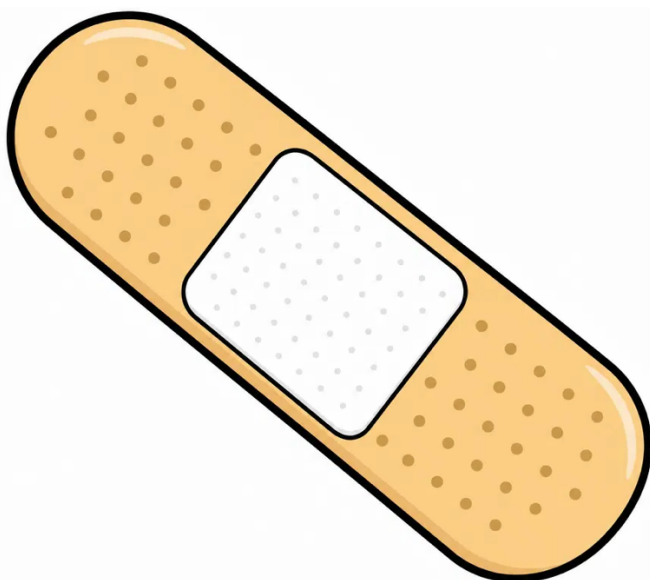

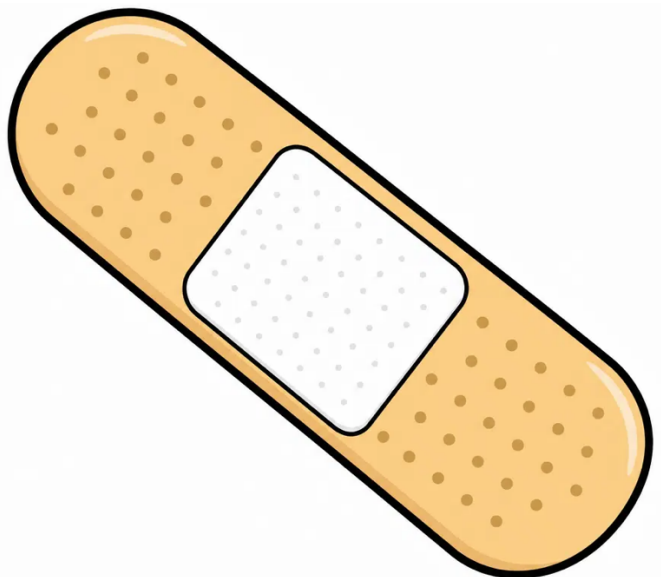

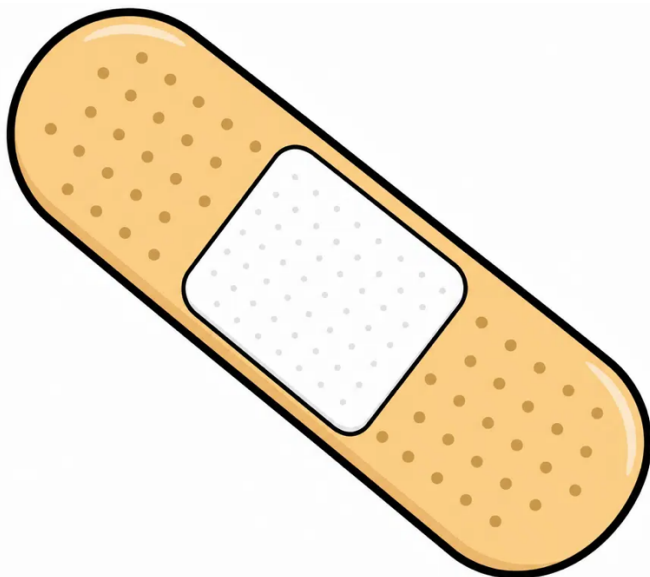

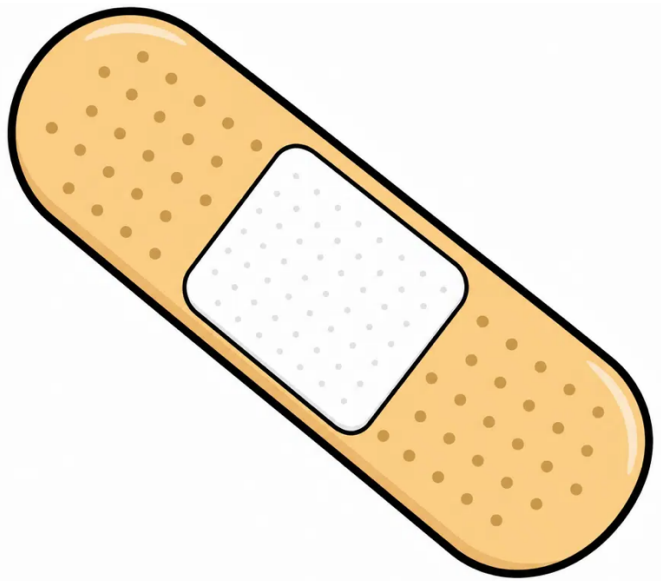

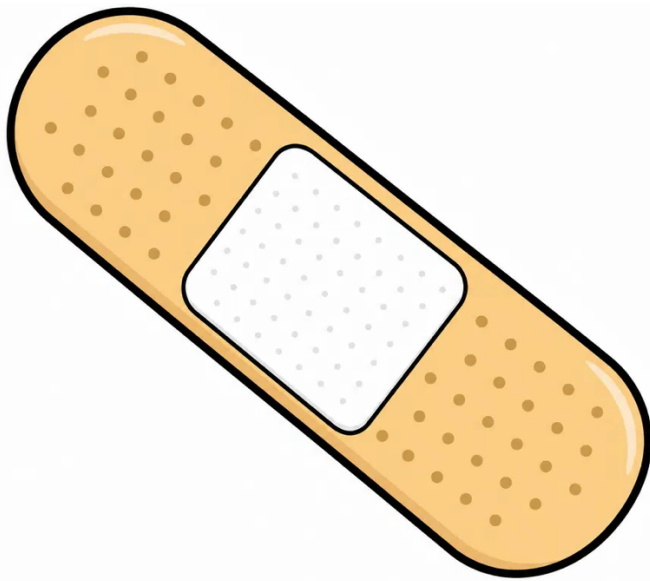

Ordliste: Ramasjang, tang, ring, sang, gang, orangutang

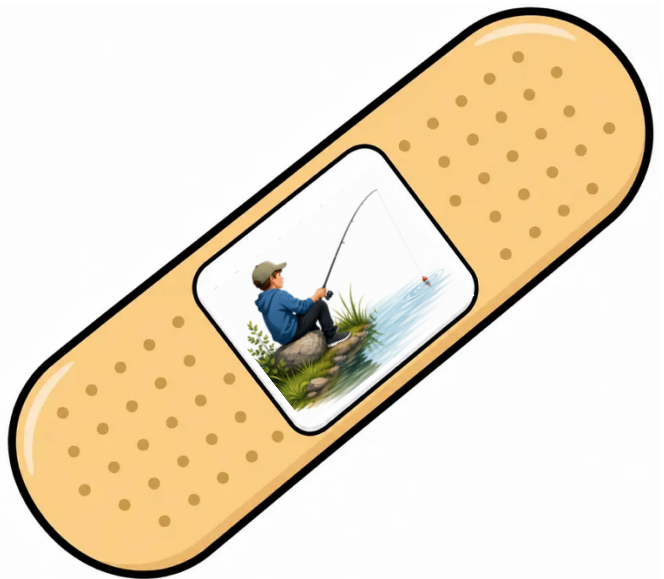

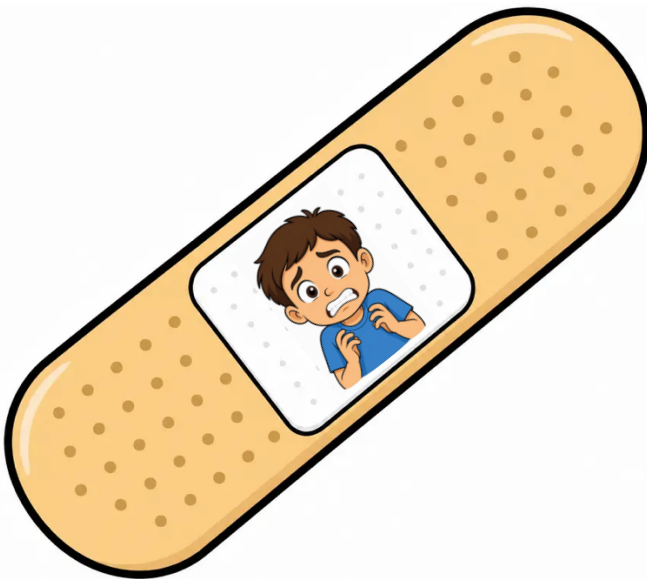

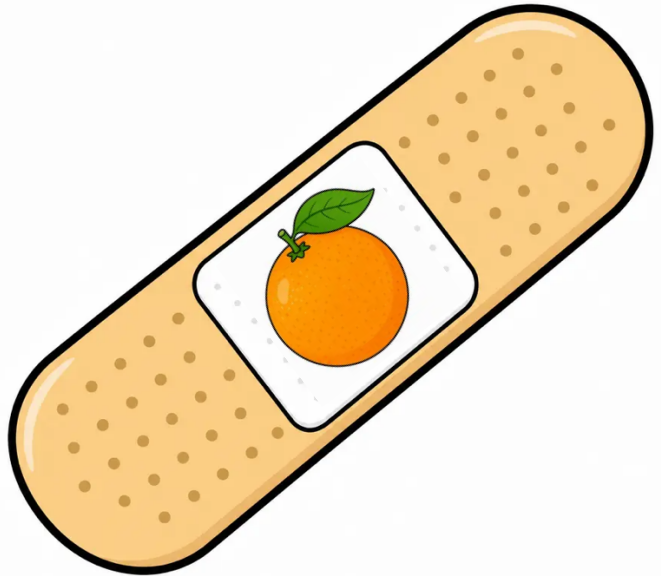

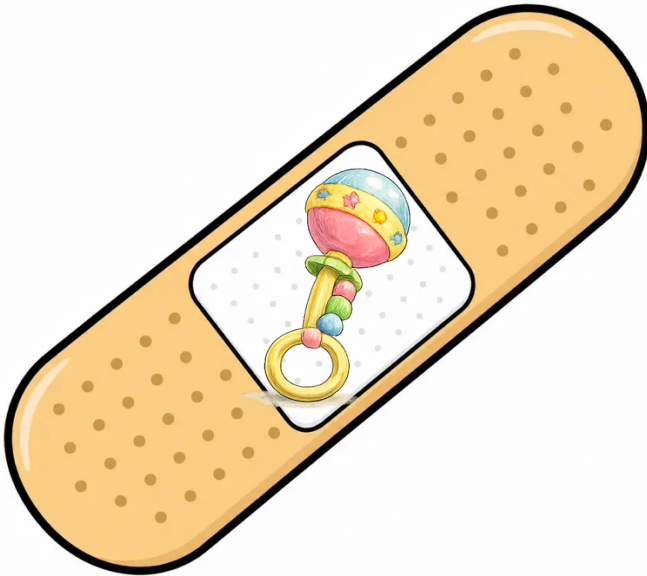

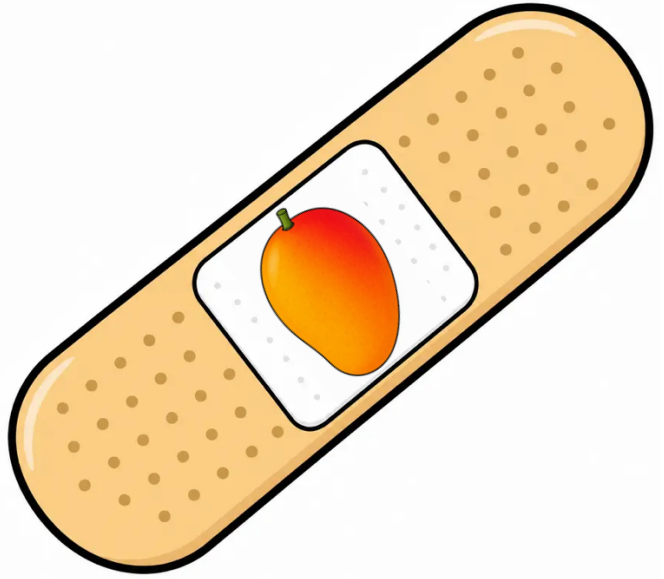

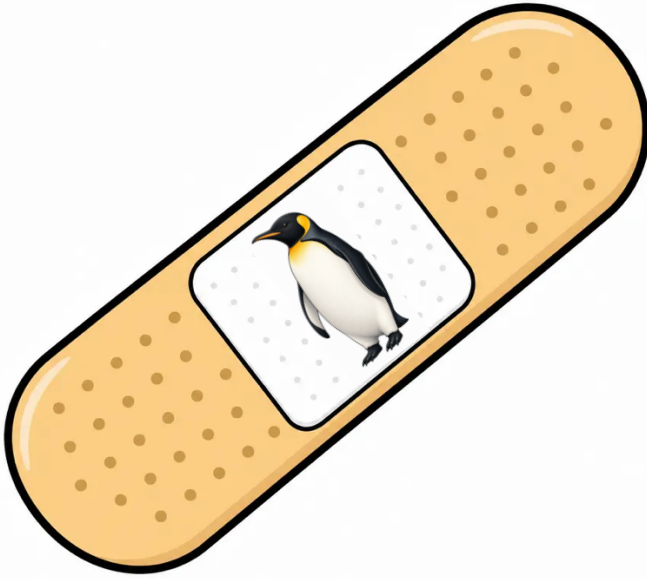

Medialt -ng-

Ordliste: engel, gynge, lunger, slange, konge, langsom

Medialt -ng-

Ordliste: pingvin, mango, range, mango, bange, fange
