

A – E – I... Der kom en lille bi!

Til træning af vokaliske lyde – nonsensord

Materialet indeholder alle de vokaliske lyde ved siden af forskellige konsonanter, i forskellige positioner. Hvis du mangler en specifik lydcombination, kan du nemt anvende den tomme skabelon og blot skrive dine egne lydcombinationer på bagsiden (downloades separat).

Fremgangsmåde: Print gerne bikuben ud i A3-format, så alle bierne kan nå at være der. Print dernæst de målord ud, som du vil arbejde med, laminér gerne og klip bierne ud. Placer bikuben foran barnet og alle bierne med bagsiden opad. Snak med barnet om hvilken/hvilke lyde I nu skal øve.

Barnet skal trække én bi ad gangen, benævne målordet (gentag gerne 3-5 gange) og herefter placere bien i bikuben. For at gøre spillet endnu sjovere kan man tilføje nogle tomme bi-brikker og hvis barnet trækker en af disse, skal barnet råbe "BI!" eller "Bien flyver/summer". Fortsæt indtil alle bierne er placeret.

Man kan også med fordel øge sværhedsgraden i spillet ved at sætte nogle af bierne sammen, så barnet skal sige nogle længere ord, fx "BA-HA" eller "ABA-VA". Man kan fx aftale at barnet skal trække to eller tre bier ad gangen, hvis barnet er klar til dette.

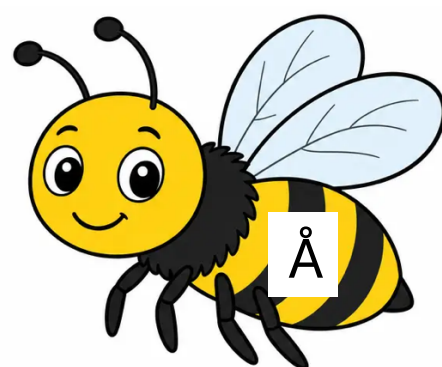

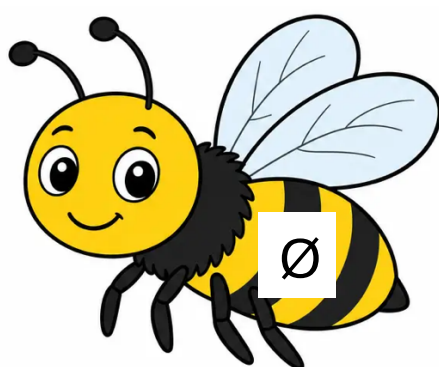

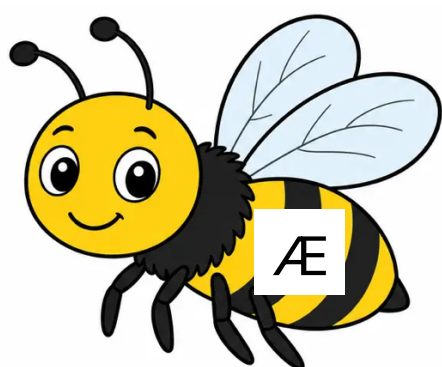

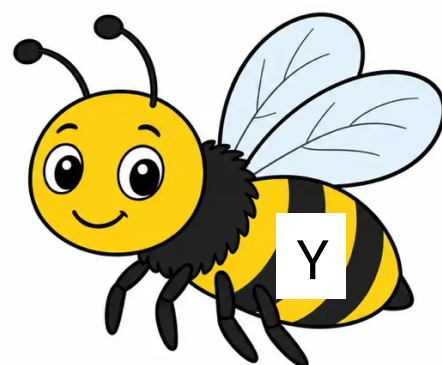

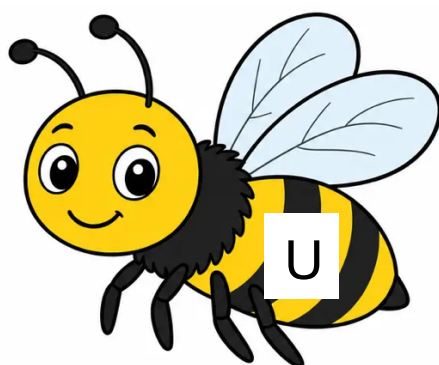

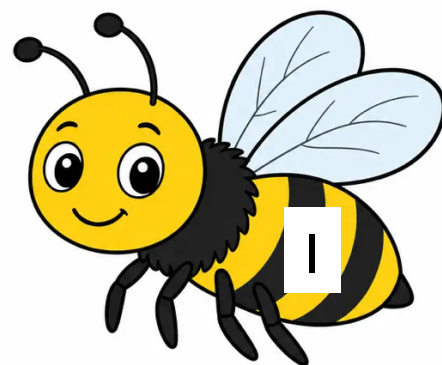

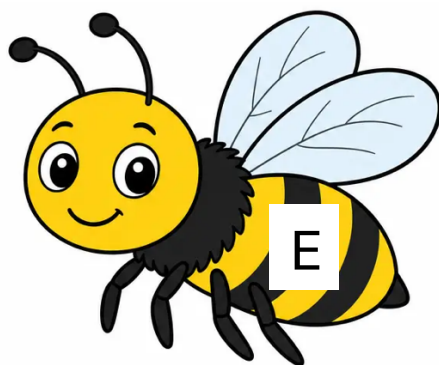

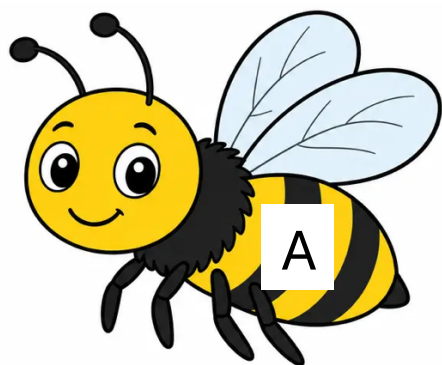

TIP: Bi-vokalsangen er naturligvis helt oplagt at synge undervejs i dette spil. Dette hjælper nemlig også på automatiseringen til spontantalen. Syng sangen undervejs mens barnet placerer bierne i bikuben eller syng den når spillet er slut.

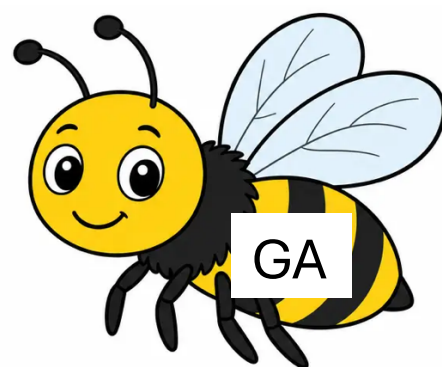

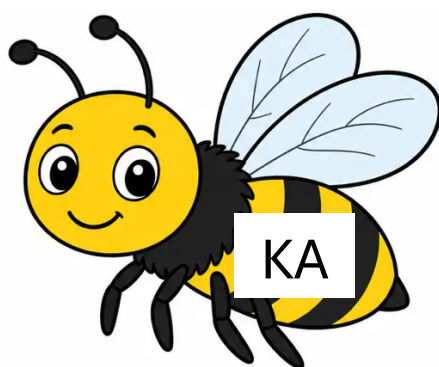

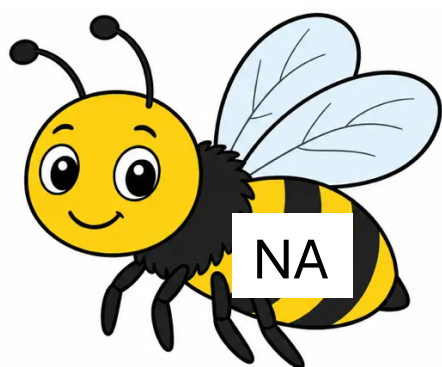

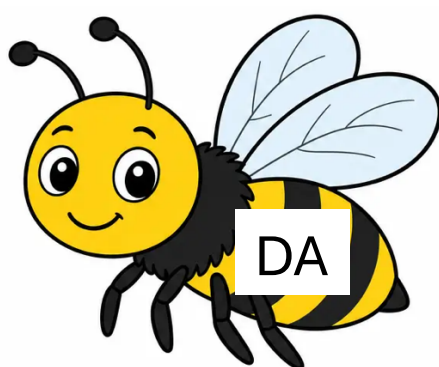

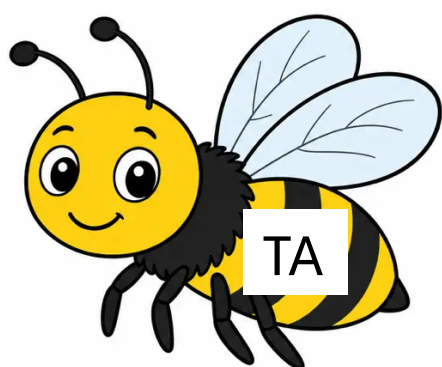

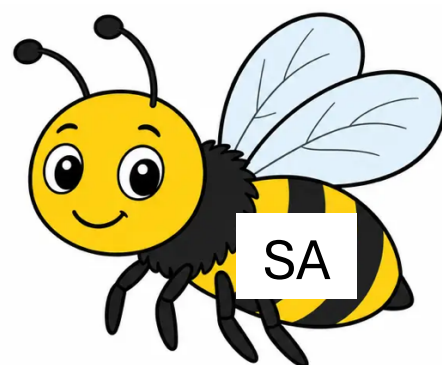

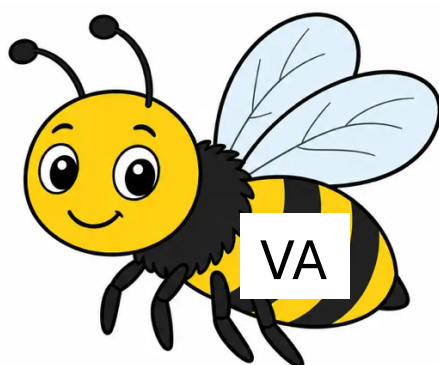

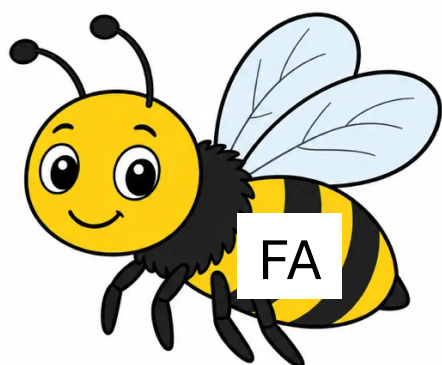

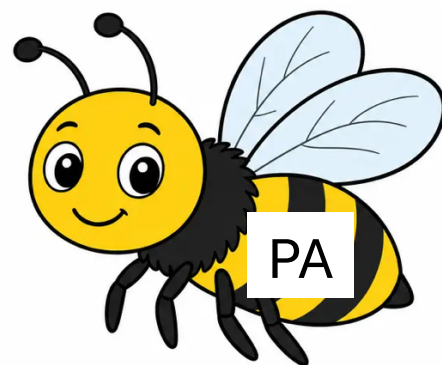

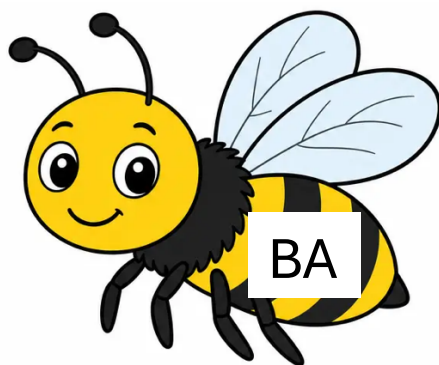

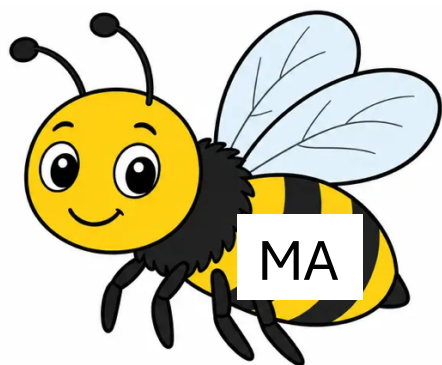

Udarbejdet af Celine Pitt. Materialet anvender billeder fra KuraPlan.
