

A – E – I... Der kom en lille bi!

Til træning af vokaliske lyde gennem specifikke målord

Fremgangsmåde: Print gerne bikuben ud i A3-format, så alle bierne kan nå at være der. Print dernæst de målord ud, som du vil arbejde med, laminér gerne og klip bierne ud. Placer bikuben foran barnet og alle bierne med bagsiden opad. Snak med barnet om hvilken/hvilke lyde I nu skal øve.

Barnet skal trække én bi ad gangen, benævne målordet (gentag gerne 3-5 gange) og herefter placere bien i bikuben. For at gøre legen endnu sjovere kan man tilføje nogle tomme bi-brikker og hvis barnet trækker en af disse, skal barnet råbe "BI!" eller "Bien flyver/summer". Fortsæt indtil alle bierne er placeret.

TIP #1: Bi-vokalsangen er naturligvis helt oplagt at synge undervejs i dette spil. Dette hjælper nemlig også på automatiseringen til spontantalen. Syng sangen undervejs mens barnet placerer bierne i bikuben eller syng den når spillet er slut.

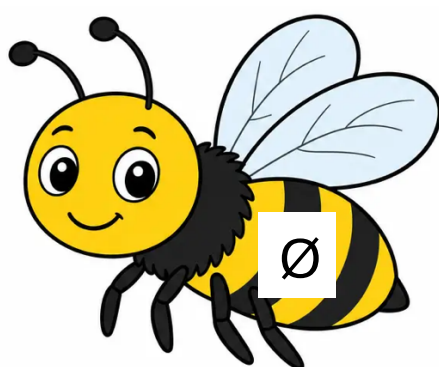

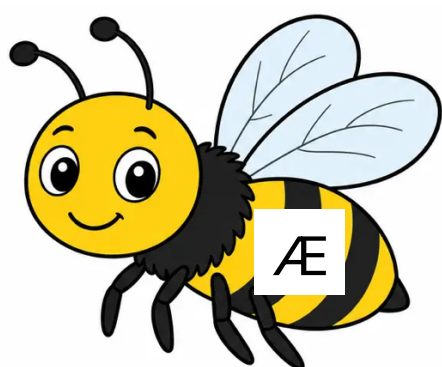

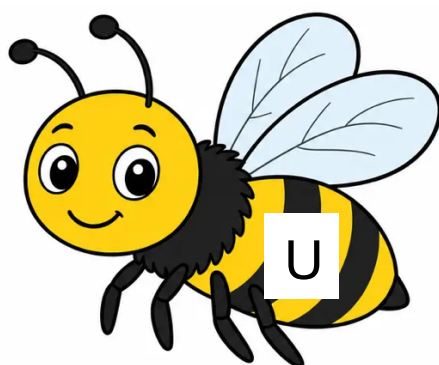

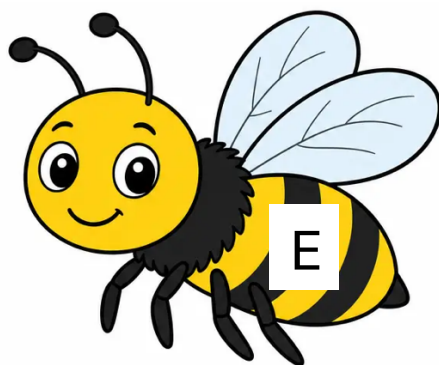

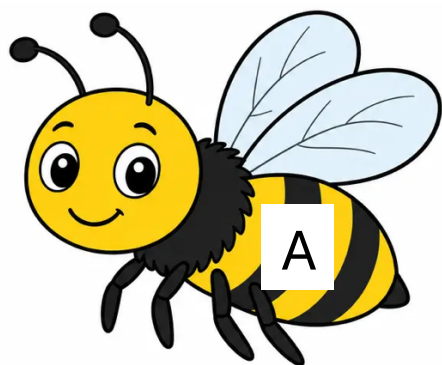

TIP #2: Flere af målordene rimer. Man kan derfor med fordel inkorporere rimøvelser undervejs. Dette kan også fungere som skelneøvelse/minimale par. Man kan fx spille at barnet skal finde et rim-stik, inden billederne kan placeres i kuben, lidt ala vendespil. Dette gør at barnet får lavet en masse gentagelser undervejs, hvilket er godt for automatiseringen.
